ON / OFF
SD Card slot

4 - Installation Diagram

1. To find ACC, set the multimeter to DC. Connect the black tip of the multimeter to the negative pole of the battery and the red tip of the multimeter to the wire you want to test.

2. When ACC is OFF, the multimeter shows 0. Turn the motorcycle key and observe the multimeter. If the tested wire is ACC, the multimeter should show a voltage of 12V.

3. If the multimeter continues to show 0, disconnect the red lead from the tested wire and test another wire until the multimeter shows 12V.

5 - Main Menu Description

Item	Function
1	Bluetooth indicator
2	WIFI indicator
3	Access Android Auto
4	Date and time
5	Access CarPlay

Item	Function
6	Tap to access Bluetooth information

3	Sets the device date and time
4	Enable/Disable phone audio

Item	Function
5	Enables/Disable key sound playback
6	Resets the device to factory settings
7	Displays device information

WARRANTY PROCEDURES

All of our products have 1-year-warranties. The following procedures must be conducted to ensure it's validity:

1 - Reach out to Tech Support

Get in touch with ZZ2 Tech Support through the phone or via WhatsApp, informing the invoice's code and the product's serial number and part code. In no hypothesis will the piece be replaced without previous contact with Tech Support.

2 - Technical Report

ZZ2 Tech Support must verify the problem as an equipment malfunction. The piece will not be replaced should the problem be caused by misuse, mis-installation or occasional falls caused to the product.

3 - Replacement

The new interface will be replaced via mail upon return of the malfunctioning product.

4 - Forward Replacement

In case the piece requires an urgent replacement, an invoice with the product's retail price will be emitted, being valid for 28 days following its emission. Upon the return of the malfunctioning hardware, the invoice will be automatically canceled, otherwise it must be paid normally.
